PROFESSIONAL SUMMARY

Final-year Information Technology student pursuing an **Honours in Artificial Intelligence & Machine Learning**, with hands-on experience in **Python, SQL, data processing, automation, REST APIs, and machine learning**. Experienced in using Python for data analysis and transformation, building technology solutions, developing APIs, and working with real-world datasets. Strong foundation in **Python programming, Pandas, SQL, AI/ML, automation, and problem solving**, with additional experience in Java, Spring Boot, and AWS. Interested in building technology-driven automation solutions and AI-powered applications.

EDUCATION

Shah & Anchor Kutchhi Engineering College, Mumbai

Mumbai, Maharashtra

Bachelor of Engineering — Information Technology

CGPA: 8.5+ — Expected Graduation: 2027

Honours in Artificial Intelligence & Machine Learning

TECHNICAL SKILLS

- **Python & Data:** Python, Pandas, NumPy, Data Cleaning, Data Transformation, Data Analysis, CSV Processing
- **Database:** SQL, MySQL, MongoDB, DynamoDB
- **Automation & APIs:** REST APIs, API Integration, Python Automation, Excel Automation, Postman
- **AI/ML:** Machine Learning, LightGBM, AI/GenAI Concepts, Feature Engineering, Model Development
- **Backend:** Java, Spring Boot, JWT Authentication, CRUD, Layered Architecture
- **Cloud & Tools:** AWS (Lambda, API Gateway, S3, DynamoDB, SNS), Git, Docker
- **Core Concepts:** Data Structures & Algorithms, Object-Oriented Programming, Logical and Analytical Problem Solving

PROJECTS

AssignHub — AWS Serverless Automation Platform

- Built a serverless assignment management platform using **AWS Lambda, API Gateway, DynamoDB, and Amazon S3**.
- Developed **RESTful APIs** for assignment submission and management.
- Integrated **Amazon SNS** to automate email notifications and system workflows.
- Designed a scalable cloud architecture involving API integration, data storage, and automated processes.

Job Portal Backend — Spring Boot

- Engineered **RESTful APIs** using **Spring Boot** and **MongoDB** following layered architecture.
- Implemented **JWT authentication, role-based authorization, pagination, and CRUD operations**.
- Tested and validated APIs using **Postman**, identifying and debugging API-level issues.
- Applied structured backend development practices for maintainable and reliable services.

TravelBuddy — MERN Stack

- Developed a full-stack travel partner matching application using **React** and **MongoDB**.
- Built backend APIs supporting **user authentication and trip management**.
- Worked across frontend and backend components to implement application workflows and data handling.

AI / DATA EXPERIENCE

Amazon ML Challenge 2025

- Developed a **LightGBM machine learning model** for product price prediction using real-world datasets.
- Worked with data preparation and model development as part of an end-to-end machine learning workflow.
- Achieved **Global Rank 2680** among participants worldwide.

Palo Alto Networks Cybersecurity Virtual Internship

- Completed hands-on training covering **Network Security, Cloud Security, and Cybersecurity Fundamentals**.
- Gained exposure to security concepts relevant to enterprise technology environments.

ACHIEVEMENTS

- **Amazon ML Challenge 2025 — Global Rank 2680**
- **Academic CGPA: 8.5+**
- Pursuing **Honours in Artificial Intelligence & Machine Learning**
